RESPONSIBILITIES	<p>In this company it was finally possible to try developing projects in a more modern and technically interesting way.</p> <ul style="list-style-type: none">- Create the information structure (taxonomy sytem, custom tax&post types)- Starting to create Custom Plugins and Themes

- Clean projects from viruses, updated from old code, speed optimisation, code refactoring and much more stuff like this
- Organise brainstorming sessions to come up with ideas and do tasks management

EMPLOYER / ADDRESS Simpals (<https://simpals.com/>)

TYPE OF BUSINESS Media and product projects, IT services.

DATES **June 2021 - May 2022**

POSITION Junior Full Stack Wordpress Developer

RESPONSIBILITIES In this company it was finally possible to try developing projects in a more modern and technically interesting way, I did things like:

- I have learned some basics of ReactJS and Laravel Framework
- I have learned how to develop custom Gutenberg blocks
- I have used tools like WP-CLI, Bedrock Framework, Laravel approach in custom WP projects
- PHP Blade Template Engine, using POO PHP and vanilla JS
- And how will do all of this without Git Docker and Composer tools?

EMPLOYER / ADDRESS Best4U International (Dynamitt Team)

TYPE OF BUSINESS IT Services

DATES **From May 2022 - July 2023**

POSITION Full Stack Wordpress Developer

RESPONSIBILITIES In this company it was possible to take the next step with ReactJS experience.

EMPLOYER / ADDRESS BackstageIT B.V. (<https://www.backstage-it.nl/>)

DATES **From July 2023**
POSITION Full-Stack WordPress Engineer with Laravel Framework skills.

RESPONSIBILITIES I was solely responsible for the company's sales website. Here I had the opportunity to leverage all my experience and knowledge in this field to drive impactful outcomes:

- Problem-solving for CI/CD
- Optimizing website loading speed.
- Project analysis and documentation.
- Reorganizing the information architecture.
- Creating tasks, timelines, and management.
- Team leading, supervising other developers, and involvement as needed.
- Front-end optimization without global refactoring.
- Technical documentation, identifying a Git workflow comfortable for the team.
- Juggling what needs to be done now and what needs to be maintained in the long term.
- Identifying a method of working with the project already incorrectly created but in a way that makes future migration simple.

EMPLOYER / ADDRESS Quadra-Digital S.R.L.

If will be necessary granular description I will attach another PDF and or you can view it in another format on my CV site here:
